PATROLEYES

DIGITAL EVIDENCE MANAGEMENT SOFTWARE 2.0

The PatrolEyes Digital Evidence Management 2.0 is a complete solution to asset management. Simply connect your camera to your PC and the software will do the rest! The software will automatically upload and remove the footage from the camera to either your local storage server or networked storage. The software allows you to add tags, comments and assign categories to the files and even mark files with an importance rating. The advanced permission system allows only certain users to upload, view, export, or delete data.

SIMPLE USER MANAGEMENT One account to upload and one account to manage data. Ideal for small departments with 10 or less cameras.

UPLOAD MULTIPLE CAMERAS SIMULTANEOUSLY Upload up to 24 cameras simultaneously from multiple loactions in your office.

LOCAL OR NETWORKED STORAGE Use a local storage server or network to store your data.

CHAIN OF CUSTODY Every action is logged and available for review any time.

CUSTOM DATA RETENTION PERIODS Custom data retention periods help ensure that you optimize storage space while important files are kept safe.
